

Nicholas Licalsi

me@nebulouscode.com | Plano, TX | nebulouscode.com | github.com/nebulous-code

Full stack developer with a decade in SaaS, reporting, and analytics that businesses depend on. I convert manual spreadsheet processes into reliable software. I care about the numbers being right as much as the code being fast.

CORE COMPETENCIES

Python · JavaScript · TypeScript · C# · Rust · SQL · PostgreSQL · FastAPI · Vue · REST APIs · Power Query · QuickBase · Git · CI/CD · Automated Testing · Report Design · Data Pipelines

EXPERIENCE

TJ Inspection

Senior Data Operations Analyst

Plano, TX

Oct 2024 – Present

- Took over Contractor Tracking as lead data analyst, documenting 19 weekly, monthly, and quarterly reports that only one analyst had been trained on
- Moved Contractor Tracking into a hosted Postgres database, wrote the ingest process for the existing workbook, and built a reporting web app on top of it
- Rewrote the weekly route sheet analysis report in Python, running it alongside the old method to ensure accuracy before cutover
- Designed a contractor efficiency report so operations could grade and reach out to contractors directly; it was adopted as a monthly report
- Cleaned up the NR weekly dashboard data and queries to get it under 10 MB, removing a zip step from the weekly process
- Set up multi-factor authentication via an authenticator app and Resend's email API
- Mentored developers on Python virtual environments, logging, pull requests, code organization, and git, and reviewed their code before release

Step Into The Road Publishing

IT Analyst

Plano, TX

Aug 2021 – Oct 2024

- Generate monthly financial reports by using an API to integrate bank with tax and budget tools
- Created and maintained 3 websites for marketing and sales purposes
- Managed automated backups on private server of employee and website data

ResMan Property Management Software

Product Manager

Plano, TX

Nov 2019 – Aug 2021

- Increased product quality by decreasing defect queue from 35 to 7 by end of 2019
- Outlined a data export tool, comparing the risks to benefits and presented results to executives
- Improved custom report request process implementing order forms to clarify requirements

Software Developer

Jul 2018 – Nov 2019

- Created new reports with a JavaScript front end, SQL stored procedures and C# data objects
- Presented release items to the Change Advisory Board with risk levels and rollback strategy
- Ran scrum ceremonies as scrum master intervening as necessary to keep meeting efficient

Rockwall OpenSpace

IT Analyst

Rockwall, TX

Mar 2017 – Jun 2018

- Opened a coworking space to help work from home professionals find community
- Determined potential revenue and risk of vacant retail locations based on rent and size of each

PROJECTS

Pokemon Card Dashboard Python, FastAPI, Vue 3, Postgres

cards.nebulouscode.com

- Ships Excel workbooks with working Power Query, pivot tables, and slicers by patching template XML directly

Quiet Cube Rust, Axum, Vue 3, Postgres

quiet-cube.com

- Spaced repetition trainer for the 57 Rubik's cube OLL algorithms, scheduled by an Anki-flavored SM-2 variant

Chip-8 Emulator Rust, WebAssembly, Vue

nebulous-code.github.io/chip8-vue

- Chip-8 emulator core published to crates.io as a Rust crate, with a wasm-bindgen wrapper for the browser

EDUCATION

Texas Tech University

Bachelor of Science, Electrical Engineering

Lubbock, TX

2016
